ABOUT

Full-stack web developer dedicated to becoming a forever student in the ever-changing world of tech. I have a passion for front-end development, design, and debugging. I thrive in a collaborative team environment and leverage my positivity to invigorate and inspire those around me. With over five years experience in the healthcare industry using varied tracking systems and software management tools, my attention to detail and communication skills have helped shape my perspective as a developer.

TECHNICAL PROJECTS

STUMPTOWN COFFEE - FRONTEND | BACKEND | DEMO

A mock e-commerce app built using React and Rails

- Created functional cart feature
- Designed front-end styling with custom CSS
- Implemented Mapbox API showing locations on map along with hours of operation

MAKES SENSE - FRONTEND | BACKEND

An app for engineers to communicate with non-technical colleagues by using real world examples to contextualize technical concepts

- Ensured user can log in with Auth and implemented CRUD functionality
- Created a single page application with vanilla JavaScript that runs on a Rails API backend
- Utilized Github to coordinate team coding and plan multiple work-streams

EXPERIENCE

PRECISION IMAGING OF NEW YORK

Administrative Assistant | New York, NY | 2010-2015

- Managed medical reports, patient files, and insurance claim filing
- Collaborated closely with partnering practices and legal firms to schedule diagnostic imaging
- Developed and implemented patient status/tracking system using AdvancedMD, TCMS, and MedFX

ALBERTSON'S

Front End Cashier | Back up Scan Coordinator | Tacoma, WA | 2001-2010

- Ensured proper pricing, itemization, tagging, signing, and documentation of UPC/PLU's for all store merchandise
- Audited scanning problems and pricing functions
- Mentored new team members on POS system operation, customer service strategies, and sales goals
